### OPEN AND EQUITABLE SCHOLARLY COMMUNICATIONS CREATING A MORE INCLUSIVE FUTURE

Prepared by Nancy Maron and Rebecca Kennison  
with Paul Bracke, Nathan Hall, Isaac Gilman,  
Kara Malenfant, Charlotte Roh, and Yasmeen Shorish

The Association of College and Research Libraries (ACRL) is pleased to announce the release of “Open and Equitable Scholarly Communications: Creating a More Inclusive Future,” prepared for ACRL by Nancy Maron and Rebecca Kennison with Paul Bracke, Nathan Hall, Isaac Gilman, Kara Malenfant, Charlotte Roh, and Yasmeen Shorish.

“Open and Equitable Scholarly Communications” is organized into three major priority areas—people, content, and systems—and each of these areas delineates several specific effective practices being used now and research topics that can help further the work in the future. The first section on people addresses embracing diversity and inclusion, improving the working lives of people engaged in scholarly communications, and increasing awareness concerning creators’ rights. The second section, content, acknowledges the opportunity for greater inclusion and openness by rethinking what scholarship “counts” and creating more representative and open collections.

### SpringerNature Releases “The Future of Open Access Books: Findings From a Global Survey of Academic Book Authors”

The majority of book authors support the idea that all future scholarly books should be open access (OA). This is one of the key findings of a new white paper presented by Springer Nature at the OAI-11 conference at CERN this week. Based on the responses of 2,542 book authors who were surveyed by Springer Nature in February and March 2019, the white paper provides a global view of book authors’ attitudes towards OA.

The survey looks at researchers’ motivations for publishing a book, and analyses the parameters and key drivers which influence academics to publish OA or not. The white paper also identifies major obstacles to OA publication which book authors still face: from a lack of awareness of OA publishing options and low funding, to concerns about how OA books are perceived.
